

NORWEGIAN **CANCER** SOCIETY

Oslo, 29 October 2015

King Olav V Cancer Research Fund's Prize 2016

King Olav V Cancer Research Fund was established in 1992 in memory of King Olav V. Each year, the fund awards a prize to a cancer researcher, or group of researchers, who have contributed to the advancement of Norwegian cancer research. The prize is awarded by H.M. King Harald. Please see our [webpages](#) for additional information.

The prize is 1.000.000 NOK.

On behalf of King Olav V Cancer Research Fund, the Norwegian Cancer Society invites the nomination of candidates to receive the prize. Candidates may be individual researchers or a group of researchers. Evaluation of the nominated candidates will emphasize the following criteria:

- Whether the candidate(s) has a clear cancer relevance in central parts of his/her research career,
- Whether a majority of the research has been performed at a Norwegian research institution,
- Whether the researcher has achieved international recognition for his/her research,
- Whether the candidate(s) over time has contributed to building and strengthening the Norwegian research environment through his/her scientific commitment,
- Whether the scientific effort represents novel work within the field,
- To what extent the candidate(s) has disseminated his/her research results to the public

The Norwegian Cancer Society encourages the submission of nominations.

The nomination must be written in English, and contain a justified proposal for the candidate according to the criteria given above, and include the candidate's CV and full publication list.

All documents should be assembled in one pdf-file and sent electronically to Asmund.Eikenes@kreftforeningen.no

Deadline for submission is December 10, 2015

Yours sincerely,
Norwegian Cancer Society

Anne Lise Ryel
Secretary General
