

Are you a PhD student in

- **biology**, wanting to learn basic concepts within bioinformatics and biostatistics?
- **statistics**, moving towards biostatistics, aiming to obtain a basic overview of core concepts within molecular biology?
- **computer science**, developing methods or pipelines for analysis of life science data, interested in learning more about the underlying biology?
- or **medicine**, overwhelmed with high-throughput data, wanting to learn ways to deal with your data?
- or simply interested in learning more about all of these topics?

You all have expertise in your own fields, and we would like you to share this with participants from other fields during the cross-disciplinary

- ✧ Morning introductions
- ✧ Keynote lectures
- ✧ Cross-disciplinary group work
- ✧ Poster session
- ✧ Network

NORBIS Summer School 2016:

An introduction to molecular biology, bioinformatics and biostatistics

which will take place in **Bergen, 13th-17th June**

Interested?

Read more and register here:

norbis.no/activities/summerschool

Deadline: **29th April**

Travel and accommodation covered for NORBIS-members!

Limited number of places available.

PhD students will have priority, others may apply.
