

Changing Delirium Practice: Challenges and Opportunities

James Rudolph

August 24th, 12.00 – 13.30

Birkhaugsalen – Haukeland University Hospital

James Rudolph, MD, SM

Associate Professor at the Alpert Medical School of Brown University and the Brown School of Public Health.
Director, Department of Veterans Affairs (VA) Center of Innovation in Long Term Services and Supports, USA.
Director of Measurement and Quality Improvement for VA Geriatrics and Extended Care, USA.

James Rudolph

James Rudolph is a Geriatrician and Palliative Care Physician who works on developing, implementing, managing, and improving programs that meet the care needs of aging individuals with a focus on maintaining their independence in the community. He is a clinician, researcher, and educator. His area of expertise is the relationship of cognitive and physical functional deficits to negative health events in older persons, particularly those who are hospitalized.

Dr. Rudolph is one of the founding members of the American Delirium Society and a leading expert within the area of delirium. Delirium, a sudden alteration in mental status, is a serious complication in hospitalized patients that prolongs length of stay, increases the risk of death and might contribute to long-term brain dysfunction. Dr. Rudolph's numerous contributions have resulted in increased awareness of delirium across healthcare settings.

James Rudolph will hold a seminar about delirium on August 24th, 12:00 o'clock at Birkhaugsalen. The seminar is open to health care providers and the public in general.

The PROCARD Research Group hosts the seminar
