CCBIO903: CANCER RESEARCH: ETHICAL AND SOCIETAL ASPECTS

Illustration: Lightspring

- Get an understanding of cancer research and clinical care from a societal and ethical perspective.
- Strengthen the impact of your work and improve communication with patients, collaborators, ethics committees, and grant reviewers.
- Get tools for systematic reflection on dilemmas in cancer research and care, including prioritization, managing uncertainty, and broader questions about what constitutes “the good life” and the future of cancer research.
- Combined with elements from the ARINA course “Transdisciplinarity, RRI and Radical Innovation”

March 23–27 + April 8 and 23, 2026
