

Board 2014:

- Prof. Stefan Johansson, leder (K2) • Overlege Camilla Tøndel (Haukeland universitetssjukehus)
- Prof. Lars Bø (K1) • Postdoc Silje Skrede (K2) • Ph.d student Maria Omsland (K2)
- Ph.d student Hildur Skuladottir (K1) • Kristian Jensen (K2), sekretær

Oral presentations from 2014

Thursday 29th of January 2014 Time: 08.30
Birkhaugssalen, Haukeland University Hospital
Program

08.30 Opening by Professor Stefan Johansson
Forskerskolen i klinisk medisin

08.35 The Norwegian Sonothrombolysis in Acute Stroke Study (NOR-SASS): A randomised controlled trial of contrast enhanced ultrasound treatment in acute ischaemic stroke.
Aliona Nacu, K1

08.50 Sjekklister reduserer komplikasjoner og liggetid
Arvid Steinar Haugen, K2

09.05 Estimated risk of radiation-induced cancer following paediatric cranio-spinal irradiation with electron, photon and proton therapy
Camilla Stokkevåg, Department of Oncology and Medical Physics, Haukeland University Hospital

09.20 Malaria prevalence among patients with acute undifferentiated fever in secondary hospitals in India
Christel Gill Haanshuus, National Centre for Tropical Infectious Diseases, Department of Medicine, Haukeland University Hospital

09.35 Giardia-spesifikk immunitet hos mennesker
Christina Saghaug, National Centre for Tropical Infectious Diseases, Haukeland University Hospital

09.50 Role of homeobox transcription factors IRX3 and IRX5 in mitochondrial development and activity in adipose tissue
Christine Haugen, K2

10.05 PAUSE

10.20 Exercise induced inspiratory stridor <EIIIS> in top athletes
Hege S. Havstad Clemm, K2

10.35 Fluid overload and impaired motility in the small intestine caused by an activating GUCY2C mutation
Hilde Løland Von Volkmann, K1

10.50 Legumain and Slc7a5 protein are involved the early processes of MS pathology
Intakhar Ahmed, K1

11.05 Aneurisme sykdom – glykemisk status og mortalitet
Iren Drange Hjeltestad, Medisinsk avdeling, Haukeland University Hospital

11.20 Musculoskeletal findings in patients exposed to workplace bullying
Kristin Buhaug, Department of Occupational Medicine, Haukeland University Hospital

11.35 Cellular immune responses elicited after intranasal influenza vaccination in children, a clinical trial

Kristin G I Mohn, K2

11.50 LUNCH

12.30 Functional characterization of rare variants of HNF1A; risk factor for type-2 diabetes?
Laeya Abdoli Najmi, K2

12.45 Addition of patella component in painful non-resurfaced total knee arthroplasties; does it help?
Leta Tesfaye, K1

13.00 Cell-to-cell communication in acute myeloid leukemia by tunneling nanotubes
Maria Omsland, K2

13.15 Preadipocyte and Adipocyte Heterogeneity within a Single White Fat Depot in Humans
Simon Dankel, K2

13.30 Evaluation of the laryngeal response patterns during mechanical assisted cough in Amyotrophic Lateral Sclerosis
Tiina Andersen, K1

13.45 Detection of rare causative variants in whole genome sequencing data
Tomasz Stokowy, K2

14.00 PAUSE

14.15 The impact of annual vaccination on the T cell responses in frontline healthcare workers
Trieu Mai Chi, K2

14.30 Childhood disadvantages modify the impact of working as a cleaner on respiratory health
Øistein Svanes, K2

14.45 Korrelasjon av transkriptom sekvenseringsdata fra formalinfikserte og parafininnstøpte nyrebiopsier vs. RNAlater® fikserte nyrebiopsier
Øystein Solberg Eikrem, K1

15.00 Per Oral Endoskopisk Myotomi I behandling av Akalasi
Pham Khanh Do-Cong, Gastroenterologisk avdeling, Haukeland University Hospital

15.15 END

Award ceremony at the foyer, Haukeland University Hospital Friday 30th of Januar at 12.00
