

MSD Invites You to Attend Lunch & Learn Seminar

Learn about the **Mesoscale multiplex immunoassay** platform. The platform offers solutions ranging from validated assays for **research & clinical biomarkers** to open platform assays allowing you to create your own multiplex/singleplex assays in Human, Rodent and NHP.

Focus: MSD offers several hundred secreted biomarker and intracellular signaling kits, including **Metabolic hormones, Neurodegeneration markers, Cytokines, Chemokines, Immuno-Oncology markers, etc.** These assays are compatible with **sample matrices including:** Plasma/Serum, Urine, CSF, Solid Tumor Micro-Environment, In-vitro Lysates, Tissues: Brain, Muscle, Skin. Assay formats include validated biomarker assays, off-the-shelf kits, antibody sets and assay development options.

Date: Thursday, **November 7th, 2019**

Time: **11:30-12.30**

Location: Seminar room 5.1/5.2, Laboratory building, 5th floor

Registration not needed - but if you sign up, no later than November 5th, we will provide a sandwich.

Registration: Janne Pleidrup Andersen,
