

VACCELERATE Volunteer Registry

Volunteers wanted
Clinical Research
- Your contribution
makes the difference!

You can find all information about
the registration on the website
vaccelerate.eu/volunteer-registry/

As the European vaccine trial network VACCELERATE, coordinated at the University Hospital of Cologne, we want to make a contribution so that people interested in clinical research and organisers of clinical studies can find each other more quickly, e.g. on COVID-19, polio, influenza and other respiratory infections.

If you register yourself or your minor child, we can inform you by email as soon as a study fits your profile. Only then you will decide whether you want to contact the study organisers and receive more information about the offered study.

Why should I register?

* You support research on new prevention measures

* If you participate in a study, you will receive extensive medical care

* Your care and safety come first

* Your registration does not commit you to anything
